AITT COURSE DURATIONS SUMMARY

AITT COURSE DURATION SUMMARY

AITT Course Lengths Summary

Below you will find a condensed summary of all the AITT accredited course durations.

Please note:

- 1 day represents 7.5 hours, and does not include time allocated for breaks.
- 0.5 day represent 4 hours, and does not include time allocated for breaks.

When possible training providers are allowed to provide extended days, providing the minimum time allocated has been achieved.

E.G. 4 x 9.5 hours days, could be enough to instead of providing 5 x 7.5 hour days.

Ratios

Course must not exceed the ratio stated on the course length:

E.G. 3:1:1 (3 candidate to 1 instructor to 1 machine)

Test Only and Conversion

Test only is available for all courses and the time allocated for this should be approximately 1 hour, per test per person.

During a test only course, you are to only provide **1 x theory, pre-use and practical test** with no prior or remedial training.

For conversions, to and from other machine types, please review the AITT document "AF043 conversion chart".

Course Restrictions

Reduced courses length can apply when a course needs to be restricted due to limited application. Instructors should refer the AITT training manual for more clarification on this.

Review of Document

AITT will constantly review the course length to make sure they are relevant and consistent, so please check the AITT members area of the website to make sure you are using the latest version.

All course length are based on **minimum** timings, of which each AITT training provider and registered instructor will be expected to achieve.

Failure to achieve these durations, could result on the course not being accredited by AITT and not being accepted onto the ACORNS database.
